

MDCA MEMBERS INPUT TO TDC MAPUA WATERFRONT PLAN – FEB 2017

*Please record your own comments/ suggestions on the named aspect for this sheet or tick another comment that you support. **All input** will be collated & relayed to TDC*

TOPIC 4– GROSSI POINT - Zoned reserve end of Tahiti St-

Topic 4 Grossi Point

Leave as is but develop more as picnic area – tables bbqs etc

It's a really good safe place to launch boats

Why aren't more boats from outside the area using Tic Toc Rd

If you're going to take boats away then it better become a really awesome flash picnic/recreation area

No power boats, just kayaks small sailing boats -windsails x 2

No camping

Not much development – let future generations have some options for development

Picnic, family swimming area

Passive recreation x 2

Low tide walk around the coast dogs allowed

Wharf is “noisy” zone Grossi Point can be a “quiet” zone – rustic, native plantings, low key picnics

Low/no power water activities

Issue of number of trailers parked

Being used for picnics/swimming and parking

G Point is silting up

Boats grounding

With (indecipherable) parking can use all areas,

Gr Point is self selecting (**not sure what these two comments mean**)

Use as boat ramp and trailer parking and swimming spot. Good as is. If too many trailers parked, need to develop a booking system.

FACEBOOK FEEDBACK

Non motorised craft only at Grossi Point

My boat which the family have had since 1964 has always been launched at grossies point and will continue to do so despite what the council decides because of its size and weight

We would like Grossi Point to remain mostly the same with the addition of a few more picnic tables. It's a great green space and is used for a number of mixed uses and it would be good to keep it versatile and for it to remain in grass with the lovely trees.

We would prefer to keep the Grossi Point boat access the same. We would support organising Grossi point so that there are designated areas for boats and swimmers using the help of signage, information boards and buoys in the water.
