

Report for Waterfront.

Advisory Group will need to be reported by Martyn or Mike as I was in Australia.

Aquarium

Jane from Chocolate dog has taken the collaborative wording for the back of the boards and is getting them printed on weatherproof aluminium to be attached. We very much appreciate her support and expertise in this. Watch that space.

Mapua School are fronting the effort for the repairs to the boards ceramics. I haven't had an update on that as yet as to how far they have got. They are seeking the help of a local professional I understand.

Waterfront Park.

At time of writing I have yet to get the latest reply from a very busy Richard Hilton re getting the stepping posts in the ground for children. I have been periodically chasing this. Richard did hope for March and that we could get the tunnel frame made in time to fit in. Neither of these have progressed due to people being so busy. I continue to chase.....

As an association we are now applying for a grant for a BBQ which will then be put on a concrete pad with shade by council. Shade is an issue in park but we have to apply for grants for all of this and get council approval for what would fit. Those trees need to get growing.
