

Roads and Footpaths – July 2020

Mapua Drive Footpath extension

This project has been delayed but Downers will be starting it in September.

Letter of thanks

A letter has been sent to the 6 owners of the private drive from the School to Ruby Bay thanking them for opening up their driveway to enable safe passage of walkers and cyclists using the Old Mill Pathway during Lockdown.

Stafford Drive Cycleway

The installation of the new pipelines down Stafford Drive has resulted in the formation of a consistently wider cycleway from the School to Pine Hill. It is briefly narrowed by the armco barrier at Seaton Valley Stream but this should not be a problem.

Seaton Valley Stream to Mapua Inlets Pathway

A well formed pathway has been completed along the northern edge of the new Mapua Inlets subdivision connecting Moreland Reserve to Bones Driveway. The TDC will now be encouraged to complete this pathway from Bones Driveway to the Old Mill Pathway.
