Mapua water and wastewater upgrade

Project Update: 3 April 2019

The upgraded wastewater pipe will be connected to the existing pump station at Mapua wharf.

Timing of work

In our last update, we said we were planning to begin construction of the water and wastewater upgrades in April. We had selected a preferred tenderer and were working

with them on finalising the design and confirming costs.

We are now planning to start work in May, subject to getting the approvals we need to award the contract.

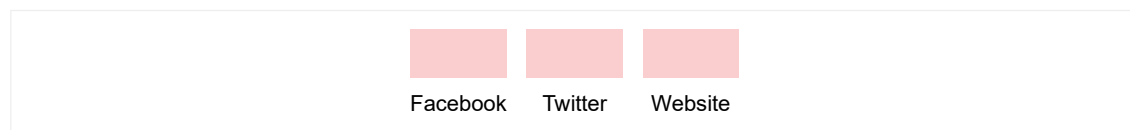

More information

If you have any questions, you can phone the project manager Rob O'Grady on 03-543 8400 or email.
