Subject: Coastal Bird Report available on NCC website

The report 'Coastal birds in NCC/TDC area' has now been released and available on the website of NCC. This report is the analysis of additional information gathered during the shorebird census work from 1996-2019.

<http://www.nelson.govt.nz/environment/nelson-nature/natural-environment/coastal/estuaries/>

The report provides additional insight in the richness of biodiversity in our area, with a particular focus on the occurrence and distribution of threatened and at risk species.

Regards
Rob Schuckard and David Melville
