Hi there,

We'd like to inform you a very important issue regarding your website which is the reason why you are losing lots of traffic.

Your website is great in terms of design and content. However, it doesn't follow Search Engine Guidelines. So, it has a very low visibility in search results.

We've done a thorough SEO audit of your website, and found that it has a big potential to generate more revenue than what it might be earning at the present. And yes, we have generated a report for the same as well.

We'd be glad to share the SEO audit report with you so that you can check it yourself and find out what should be done to make it SEO friendly.

**Let me know if you are interested, I will send you a free of cost and no obligations audit and keywords recommendation report for your website?**

I'd be happy to share our past work and client testimonials and Client testimonials

Thanks and Regards,

Gareth James
