

Moreland Reserve to Bones Driveway Pathway

Hi Richard and Steve,

I want to thank you for the great work that has been done on this pathway. Nobody advised me that it was done but I happened upon it this morning. A great crossing over the Morely Drain and a wonderful surface for biking along the completed subdivision.

Will the surfacing of the pathway across Stage 3 of the subdivision be done when that is completed? Are there any impediments to that happening?

We now need to consider what needs to be done to complete the pathway from Bones Driveway to the Old Mill Pathway:

- I am assuming that crossing the Bones Driveway bridge to the beginning of the last section of the pathway has no impediments?

- The pathway to the next private driveway will be straightforward

- The major hurdle will be getting signoff on crossing the private driveway to the Old Mill Pathway - How do we handle this Beryl?

- Once we have approval to cross the driveway, I'm assuming that kissing gates will need to be installed on either side?

- It is expected that this pathway will take pressure off the Aranui Road footpath so its completion is important.

Can your responses please be edited into the message above?

Many thanks

Wayne Chisnall
