

## Report From Dominion Flats sub committee

The reserve, along with the rest of the district would benefit from a really good rain right now but unfortunately we have to take what is.

The plants are gradually winning over the grasses as they continue to grow although there is a bit of competition at present.

Our work team is back into Tuesday mornings after just a few weeks off over the holiday break so the sound of weed eaters can be heard again as they chomp into the grass. We usually have five people who come each week to hand weed using small bladed tools with two or three other hand weeders who come occasionally, and three men who bring their weedeaters to attack the areas between the plants, but we would love a bit of help at present. We free up the plants using hand tools that we can provide so if there is a group of people who feel they could spare a morning just to help us try and get on top of it all we would love to hear from you. Just a one off session from even just one person would make a difference. Remember this space belongs to all of us and while it is great when people say what a wonderful job we are doing, we will happily share the glory with anyone who is willing.
