Roads & Pathways	8:00pm 15 mins	<p>Streets for People: Attended Drop-in session at Java Hut where 100+ residents provided feedback to TDC staff on existing Cycle Path / Shared pathway plans. Similar sessions were conducted at the Kids+Coffee and Seniors Monthly Meeting.</p> <p>Attended Streets for People Working Group where current plans were presented and significant feedback provided to Consultants running the process:</p> <ul style="list-style-type: none"> - Community concerns identified from survey results were need for pedestrian crossings, path widening, lose of parking, slowing traffic and enforcing 30kph along length of Aranui Rd <p>Due to community demand, baseline survey will be reopened thru to end May to allow for additional feedback – link below: https://shape.tasman.govt.nz/streets-people/mapuasfp</p> <ul style="list-style-type: none"> - Attendees raised a number of issues regarding the current plan for a shared 2-way pedestrian path/cycleway along the eastern (seaward/wharf-bound) side of Arauni Road: <ul style="list-style-type: none"> o Lack of separated pedestrian path and cycleway o Safety concern of existing kerb between pathways o Plan not including option for extension of existing footpath on western side of Aranui Rd up to Aranui Park entrance o Access of FENZ vehicles along narrowed roadway and lack of consultation with FENZ and Medical Centre o Issues with raised pedestrian crossings vs level entry crossing o Location of bus stop o Change of location of disabled parking outside Medical Centre o Potential issues with recycling pickup - Consultants clarified the existing traffic/roading laws around raised vs level pedestrian crossing and adjacent parking, together with road width vs speed regulations - Working group was shown examples of tradition hard plastic road barriers that will NOT be used and instead locally-sourced concrete barriers are being investigated - Depending on materials availability, plan is to start work on cycleway in Aug/Sept and conduct trial from Oct-Dec 2023 - Post implementation, TDC will monitor traffic volume/speed, conduct further pop-up sessions and provide scannable codes for users to submit feedback of the layout. At the end of the trial, a post-trial survey will be conducted to inform any decisions around a more permanent cycleway. <p>Bluff Hill – TDC have received updated advice from their Geotech Consultants regarding the risks and mitigation options for safe longer-term re-opening of the bluffs road. A plan is being developed and materials sourced to implement a solution that involves a 50kph speed limit, two-way traffic along the majority of the incline but with a single lane one-way priority in the narrowest part with highest slip risk, and a debris barrier along the full length of the road. Once this has been finalized, the current traffic lights will be removed, but the road will continue to be closed during heavy rain events for safety reasons.</p>	Paul
