

MDCA AED report

General meeting dec 2023

To date 15 persons have expressed an interest in either AED training or a Basic Life Support training

The former will only involve about ½ hour of training, the latter will be a full day course. The numbers are evenly divided between the two courses.

I have had an offer of help from Maarten Verschuuren who is a paramedic. This would enable us to also provide CPR resuscitation training.

Now that I have numbers and once I finalise Maarten's involvement, I will be able to present the MDCA with costings, reflecting that a Basic Life Support training will involve significant cost either to the MDCA or to the participants.,
