Thank you for your interest. Yes, a good idea for a topic for a meeting and the exec will approach
CD for them to do a presentation. Helen

Hello, Helen.

I am still interested in helping.
It would appear that Civil Defence expects that local communities do what they can to organise and use local knowledge in a response.
I attended a meeting in Motueka on July 12 hosted by CD, and they handed out a template for a community emergency preparedness plan.
I believe this is a worthwhile effort, and deserves input from both the MDCA and MBCA.
Any plan should evolve, as both the physical layout of the community and our understanding of the area are changing.

Is this a good topic for discussion at the MDCA, in a future meeting after the August AGM?

Hi Bruce . I have been given your name that you are willing to help with Civil Defence in Mapua should the need arise. At present we are waiting to hear from the centre in Richmond as to the next meeting and Kathy said they will let you know too. We have not got a formal arrangement in Mapua at present apart from the fact that the welfare centre would be Hills Community Church in Aranui Rd or Mahana School if it was necessary to be on higher ground. It is good to know there are willing people in the community Regards Helen Bibby
