Subject: Community Emergency Preparedness Plan

Kia ora Paul

Please find attached the documents for the Community Emergency Preparedness Plan.

Congratulations for taking the lead within your community in creating a community owned and completed emergency plan.

You'll note there are four attachments:

- The guide to preparing the plan. Have a read before beginning as it is full of tips and ideas
- Section A is the template itself where information is captured by the community and distributed throughout the community
- Section B contains more specific information and is held by an emergency team within the community as it holds details that people may not want about them shared with the whole community
- Section C-the reference section is a quick reference sheet for Nelson Tasman Emergency Management (NTEM) to use during a response. NTEM will hold copies of all three documents which can be referred to for more in-depth information if required

I have let our partnering agencies, FENZ, Neighbourhood Support and Police know that your community maybe about to create a plan as they may wish to engage with your community to support the process.

Any questions feel free to reach out.

Ngā mihi
